

# ADZUKE Practice for SAP

Our heritage is delivery and transformation. We are the proven, safe hands for your SAP transformation

## **ADZUKE Technology and SAP – Working Together**

"As organisations seek to respond to evolving market demands, ADZUKE is committed towards developing next-generation solutions that help our customers adapt quickly and meet the competition head-on. With more than 15 years of collaboration with SAP customers across APAC, EMEA & North America, ADZUKE has the unique experience and industry expertise needed to help drive change within your business."

**Minesh Shah/ Devesh Gaur**  
Partners, ADZUKE Practice for SAP

The background of the slide is a vibrant, futuristic cityscape at night. A prominent skyscraper with a spire is centered in the background. The scene is filled with dynamic light trails in shades of blue, green, and red, suggesting motion and digital connectivity. The overall aesthetic is high-tech and forward-looking.

**At ADZUKE, our Practice for SAP is helping enterprise organisations to reimagine their future and accelerate their business transformation. We work with our customers to enable them to become an intelligent enterprise.**

# ADZUKE Practice for SAP transforms organisations to increase resilience, agility, and productivity

Digital transformation is a journey with the same destination for all organizations. The only difference is where you start and the tools you leverage to reach it.

ADZUKE Practice for SAP is a part of the ADZUKE Enterprise Applications and SaaS offerings, which sits within ADZUKE's Enterprise Technology Stack.

Our practice provides a full spectrum of SAP-based solutions to help organisations solve complex business problems, minimising the disruption, risks, and costs of growing their business. Our industry knowledge and robust line-of-business offerings streamline internal processes on SAP in the cloud or, on premise to achieve greater organizational transparency and efficiency.

Our services support the entire adoption lifecycle –from strategy and design to deployment and operations. We offer flexible, value-driven consulting that helps you develop a solution roadmap, perform your migration, and we provide a choice of managed services.

As a trusted advisor, we adopt a holistic view of your business, drawing on our expertise and experience to execute strategies that are practicable and directly aligned to your business priorities.

We maintain a curated partner ecosystem built on a foundation of trust, collaboration, differentiation and innovation. This ensures we deliver the right solution and team to address niche, complex, and critical customer business challenges.

**ADZUKE Practice for SAP is the safe hands that help you simplify IT, modernize applications, reimagine processes and accelerate your business transformation while realizing the total value of your SAP investment.**

# Five reasons why ADZUKE Practice for SAP is leading the way in business transformation

## End-to-end connectivity

We understand highly complex business models and provide the expertise to simplify processes while driving innovation and value through end-to-end solutions for SAP and enterprise application software.

## Addressing core issues

We provide a full spectrum of SAP-based solutions to help extend your ability to quickly respond to market dynamics, simplify your operations and minimise the disruption, risks, and costs of enterprise evolution.

## Guiding your journey

We work closely to understand your challenges, prioritise high-value improvements, and design a modernisation roadmap that delivers incremental ROI at each meaningful step on your transformation journey.

## Breadth and depth

We know SAP provides the optimum platform for business transformation. As a group of seasoned SAP practitioners, we have the deep industry knowledge and powerful line-of-business offerings to streamline the journey and enable you to reimagine your business.

## Planning and execution

We help organisations build a strong business case for a discrete initiative or agenda of work, quantify the impact of addressing these needs and shape a program enabled by SAP solutions that focuses on business results.

“For us delivering excellence means getting product to our customers when they expect it. In health, there can’t be any surprises. We started with a pilot of a site in Mattoon and have now moved our biggest Distribution Centers to SAP. Partnering with ADZUKE and SAP has allowed us to live up to our promise.”

Senior Experience and Strategic Design Manager

# ADZUKE Technology's Enterprise Applications Practices help customers Develop, Integrate, Implement and Manage Enterprise Applications.

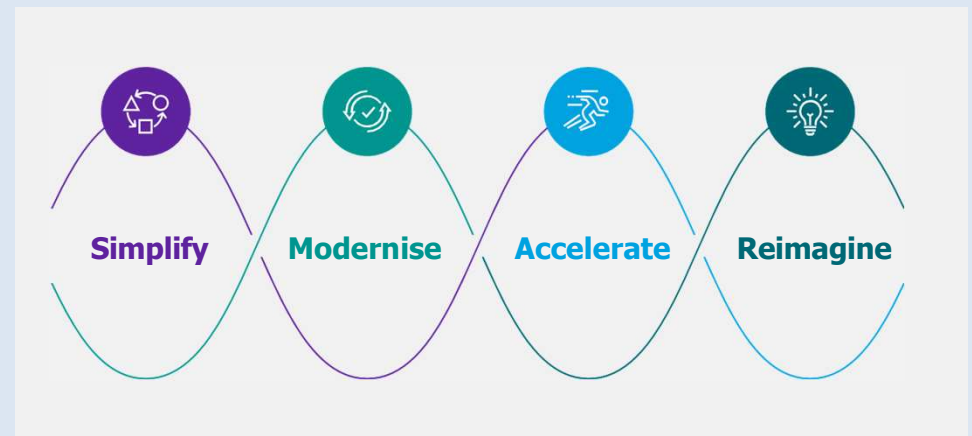

Our customer engagement is based on four important focus areas that we know drive sustainable business improvements and maximise application value.

**Simplify** IT platforms and remove complexity to help operations run more efficiently, drive out costs and remove technical debt.

**Modernise** to reduce risk and optimise the business for better agility and resilience in response to disruption.

**Accelerate** time to market, drive business process improvements enabling rapid business growth and improve employee and customer experiences.

**Reimagine** new possibilities in response to changed business rules with innovation from the ground up and the top down.

We use these principles to rethink enterprise applications and deliver services and solutions that truly transform business.

## Business transformation - simplify

We implement agile transformations to improve the customer experience. Organisations who experience the most success achieving this goal, addresses the needs of their workforce along the way.

ADZUKE understands business models can be highly complex. We work to simplify business processes by leveraging engines of innovation such as the cloud to reduce technical complexity.

We simplify processes using SAP in the cloud or on-premise, standardizing them on SAP S/4 HANA's intelligent digital core technology. We enable the agility, speed, and efficiency required to manage resources cost-effectively by rationalising operations with SAP to drive innovation and eliminate IT complexity. This creates a flow of intelligent, real-time information to run a live, digital business in a networked economy.

Our flexible approach ensures transformation success. We use experience solving similar problems in other industries and account for strategic, operational, financial, and technical considerations.

"Our SAP transformation journey was made seamless thanks to the professionalism and deep expertise of Adzuke's team. Their mastery of SAP solutions and commitment to excellence helped us modernize our systems, enabling us to streamline operations and drive business growth. The team's ability to understand our unique needs and deliver tailored solutions exceeded our expectations. We are now better positioned for the future with scalable systems and a more efficient, data-driven approach to decision-making.

Spare Parts Industry Leader

## Case Study: Automobile & Spare Parts Industry

Our client is a prominent player in the spare parts industry, specializing in delivering high-quality components for automotive, industrial, and consumer applications. With a global supply chain and a reputation for reliability, the client serves a diverse customer base ranging from OEMs to dealers and end-users.

### How ADZUKE helped

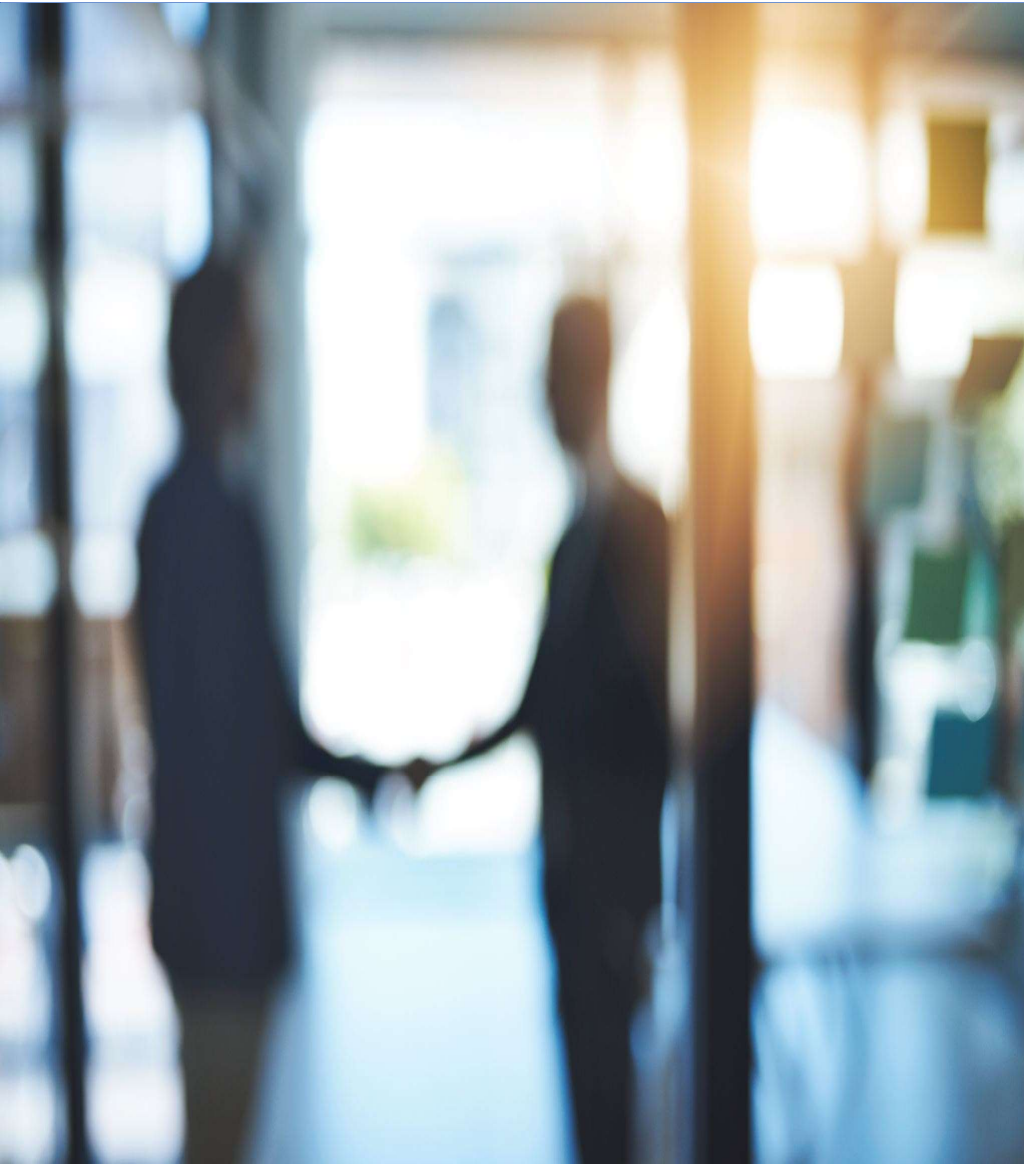

- Our team implemented out-of-the-box SAP S/4HANA solutions, ensuring a clean core system to power the client's critical business processes. Acting as Subject Matter Experts, we provided strategic guidance in key functional areas, including Source to Procure, Manufacturing, Order to Cash, Warehousing, and Transportation Management.
- We enabled a swift go-live for various FIORI applications, driving next-gen process adoption. This significantly boosted employee productivity, reduced training requirements, and enhanced system performance.
- By working closely with business teams, we facilitated seamless change management from both process and system perspectives. Additionally, we identified and addressed gaps in SAP standard solutions early in the project lifecycle, leading to better process optimization and improved overall productivity.

### Key Benefits Delivered

- **Streamlined Operations:** Successfully decommissioned 40+ legacy applications, reducing complexity and operational costs.
- **Improved Resource Utilization:** Enabled high resource utilization through effective planning and integrated workflows.
- **Data-Driven Decision Making:** Provided real-time availability of critical information, empowering leaders to make informed business decisions swiftly.
- **Scalable Growth:** Built scalable and maintainable systems, positioning the client for innovation and long-term growth.
- **Enhanced User Experience:** Simplified business transactions with improved user interfaces, boosting employee productivity and enhancing end-customer satisfaction.
- **Ability for powerful insights,** enabling data-based judgements

## Business transformation - modernise

"Our goal is to help customers navigate the uncertainty of today and plan for a better tomorrow. Achieving competitive advantage now requires businesses to consider modernizing their operating models."

ADZUKE understands how to modernize and optimize your organization's IT environment and applications. We use a whole-of-business approach to create highly scalable, flexible, future-proofed environments.

We manage and optimize your path to SAP S/4HANA, ensuring transformation success is simple, at speed and low risk using our suite of regional and global partners and tools to support migration and automation.

ADZUKE helps modernize operations and transform business using deep SAP ERP cloud or on-premise solutions.

# ADZUKE empowers business with SAP offerings

## **SAP Digital Transformation & Advisory Services**

ADZUKE helps bring ideas to market by optimising business across the entire innovation lifecycle with SAP Digital Transformation and Advisory Services. Our strategic advisory service which includes digital strategy, business case development, enterprise architecture and roadmapping, helps organisations unlock their full potential while defining a best-practice transformation journey.

## **SAP Innovation, Solution Extension and User Experience Services**

ADZUKE drives ambitious business goals by delivering functional solutions extensions and user experience services. These services include human-centered design, SAP cloud platform, SAP Fiori & UX, SAP Leonardo, Machine Learning, RPA, and AI.

## **Services for SAP ERP**

ADZUKE's capability extends across the full spectrum of SAP's ERP offerings and across all line-of-business processes including finance and spend management, procurement and supply chain. We help drive digital enablement across your business with S/4HANA, streamline business processing, foster better integration capabilities, and build deeper customer connections.

## **SAP Migrations and Carve-outs**

ADZUKE simplifies a business restructure with SAP Migrations and Carve-outs. Carve-out projects in SAP systems help de-link operations, in-turn supporting a roadmap and delivery of migrations from legacy to next generation.

## **Moving to the Cloud**

ADZUKE helps businesses carefully plan their move to the cloud and the adoption of cloud solutions to drive holistic business transformation. SAP Cloud Solutions include Partner Managed Cloud, Public Cloud (AWS, Azure, Google), and IaaS, PaaS and SaaS.

## **Managed Services**

ADZUKE supports businesses across all SAP platforms and versions, cloud and on-premise and continually monitors the health of SAP applications to maintain full functionality. As an SAP Managed Services partner, ADZUKE provides full technical support services and multi-shoring for projects with continuous support (24x7).

## **SAP Commerce**

ADZUKE helps to engage customers across all devices with SAP Commerce. This modular architecture allows data to be disseminated via multiple channels. This family of SAP Cloud solutions deliver customized, meaningful experiences, and include Marketing Cloud, Commerce Cloud, Sales / Service Cloud, and Customer Data Cloud/Customer Data Platform.

## **SAP Customer Experience (CX)**

Using SAP Customer Experience technology, ADZUKE helps design and implement unified, seamless customer experiences that are people-focused and business-driven.
